Left-Handed Handwriting Sheets with Slant Guides

Worked example / complete source key

A learner writes a row of 10 letters. 8 letters touch the baseline and 6 follow the slant guide. What fractions describe baseline contact and slant following, and what does each fraction mean?

Answer: Baseline contact is 8/10, which simplifies to 4/5. Slant following is 6/10, which simplifies to 3/5. The baseline fraction means most letters sit on the line; the slant fraction means just over half follow the guide, so the next session could focus on slant consistency.
