Letter Formation Stroke-Order Tracing Practice: Numbered Rows and Blank Practice

Original tasks 1, 2 / independent work

Task 1

A tracing row for the letter i has two numbered strokes: stroke 1 is a short vertical line from midline to baseline; stroke 2 is a dot above midline. The learner traces stroke 1 from 6 mm to 0 mm, then stroke 2 at 8 mm. Baseline is 0 mm and midline is 6 mm; these values are hypothetical. Score stroke order and baseline placement.

Task 2

A tracing row for the letter t has two numbered strokes: stroke 1 is a vertical line from above midline to baseline; stroke 2 is a horizontal crossbar at midline. The learner traces stroke 2 first, then stroke 1. The vertical line ends at baseline. Score stroke order and state one fix.

Letter Formation Stroke-Order Tracing Practice: Numbered Rows and Blank Practice

Original tasks 3, 4 / independent work

Task 3

A blank row is used for independent practice of the letter n. The learner forms two vertical strokes and one connecting arch, but the first vertical stroke starts at midline and the second starts above midline. Baseline is 0 mm and midline is 6 mm; values are hypothetical. Score x-height consistency and suggest one adjustment.

Task 4

A learner completes a tracing row for the letter p with two numbered strokes: stroke 1 is a vertical line from midline to below baseline; stroke 2 is a loop from midline to baseline. The learner traces stroke 1 from 6 mm to -3 mm, then stroke 2 from 6 mm to 0 mm. Baseline is 0 mm, midline is 6 mm, and descender space is -3 mm; values are hypothetical. Score all three rubric elements.
