Letter Formation Stroke-Order Tracing Practice: Numbered Rows and Blank Practice

Worked example / complete source key

A learner practices the letter i on a row with two numbered strokes: stroke 1 is a short vertical line from midline to baseline; stroke 2 is a dot above midline. The row height is a hypothetical 12 mm, with baseline at 0 mm and midline at 6 mm. The learner traces stroke 1 from 6 mm down to 0 mm, then places stroke 2 at 8 mm. Score the row using the rubric.

Answer: Stroke order: 2 (both strokes in numbered order). Baseline placement: 2 (stroke 1 ends at baseline). X-height consistency: 2 (the vertical stroke starts at midline and the dot sits above midline, matching the chosen style). Total 6 out of 6. The row meets the convention; the 12 mm, 6 mm, and 8 mm values are hypothetical examples and should be replaced by measured values.
