Capital Letter Stroke Tracing: Build Uppercase Letters from Parts

Worked illustration

Follow this lesson pen order / print scale 1 / dimensions describe the original drawing

Worked A / crossbar below half-height

A / frame 16 x 24 mm

One chosen guide layout, not a handwriting standard. Solid starts; open unshared ends.

Capital Letter Stroke Tracing: Build Uppercase Letters from Parts

Original worked example / unchanged complete key

Prompt: Trace capital A on a row with a baseline, midline, and cap line. The apex start dot is on the cap line at the top center; the two bottom dots are on the baseline at the left and right. The crossbar dots are below mid-height (for example, at the midline) on each diagonal. Describe the stroke order and the check.

Answer: Start at the apex dot on the cap line, trace the left diagonal down to the bottom-left baseline dot. Lift. Start again at the apex dot, trace the right diagonal down to the bottom-right baseline dot. Lift. Start at the left crossbar dot and trace horizontally to the right crossbar dot. Check that both diagonals meet at the single apex on the cap line, the crossbar sits below mid-height between them, and all strokes stay inside the guide lines.
