Uppercase and Lowercase Letter Cut-and-Paste Sorting

Worked example / complete source key

A card shows the letter form B. Another card shows the letter form b. A third card shows the letter form g. Decide the correct column for each card and explain why.

Answer: B goes in the Uppercase column because it is the capital form. b goes in the Lowercase column because it is the small form, even though it has an ascender. g goes in the Lowercase column because it is the small form, even though it has a descender. The decision uses letter form, not card size or height.
