Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

Worksheet measurement fields: measured rule spacing and measured left margin width

Practice values and reasons empty; units inches. Hypothetical examples 0.5 in and 1.5 in are not pre-filled.

Measured rule spacing (in) (in)	
Measured left margin width (in) (in)	
Measured paper width (in) (in)	
Measured paper height (in) (in)	

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

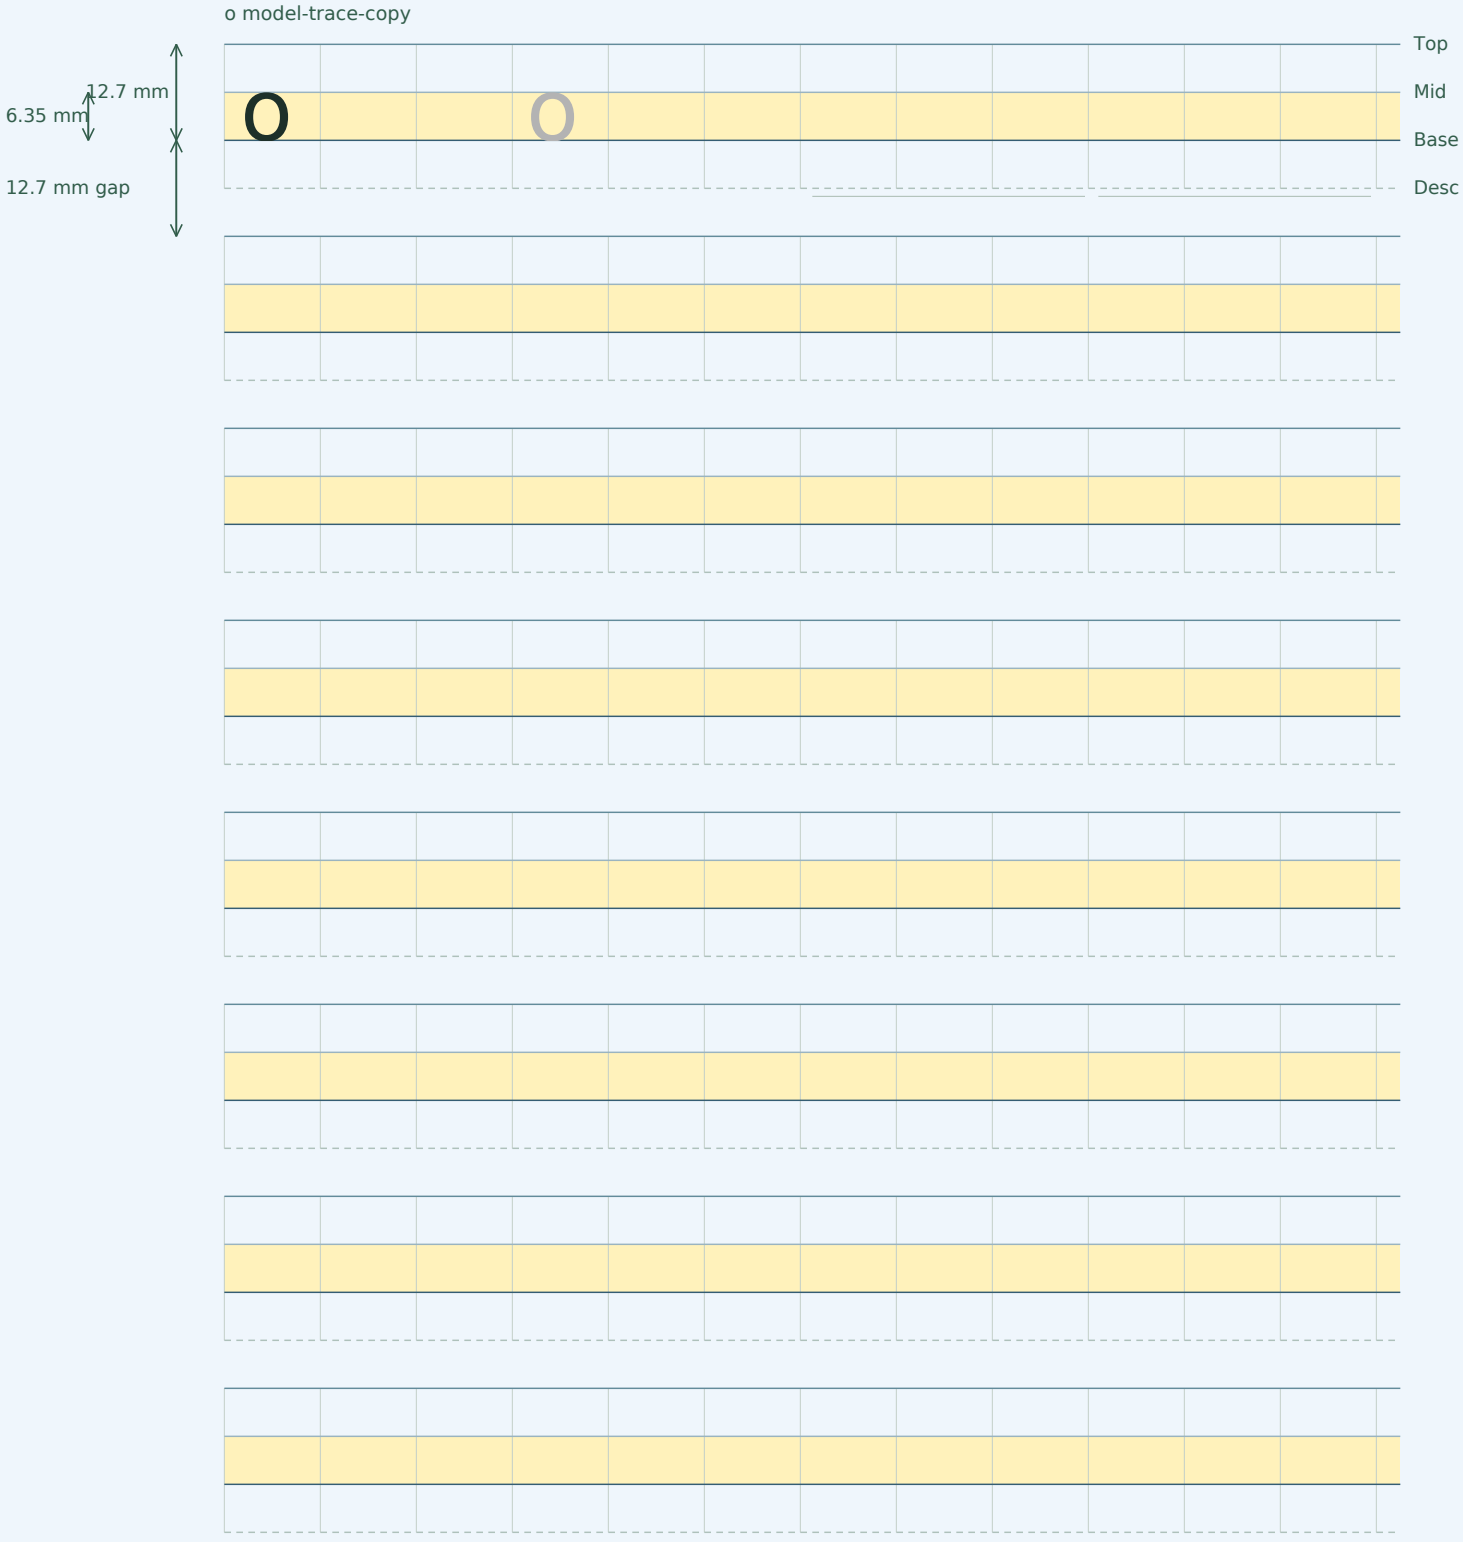

Worksheet instruction block: baseline, midline, x-height zone

Instruction text only; no answer values.

Baseline is the bottom rule of a band. Midline is the rule above it. The x-height zone is the vertical distance from baseline to midline. Lowercase bodies sit in this zone; ascenders and descenders may cross into adjacent bands. Letter styles vary, so this defines a checkable zone, not one universal shape.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

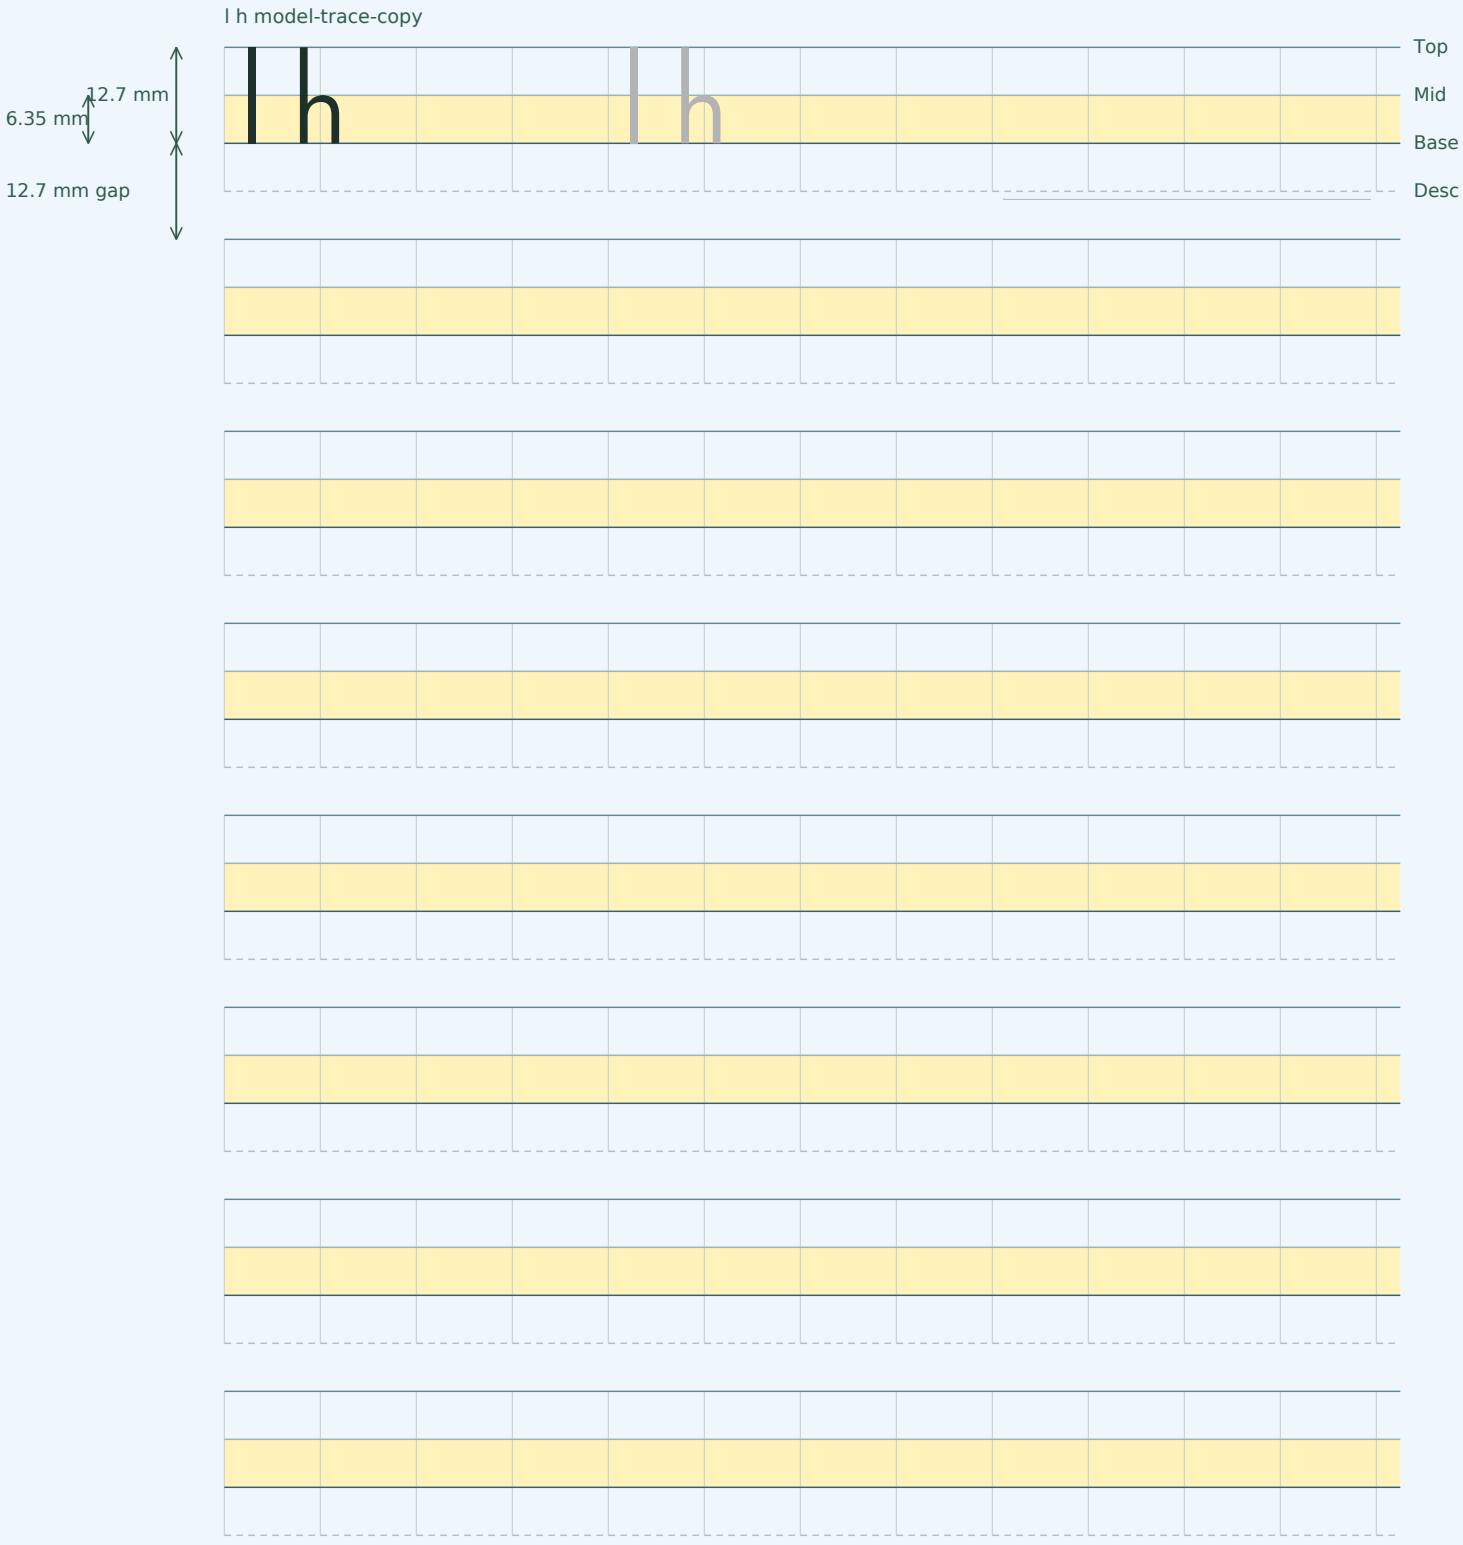

Worksheet practice band: model o, gray trace o, two blank copying attempts

One physical row: model o, one gray trace, two blank copies. Hypothetical 0.5 in rule spacing; top_mm=12.7, mid_mm=6.35, desc_mm=6.35, gap_mm=12.7.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

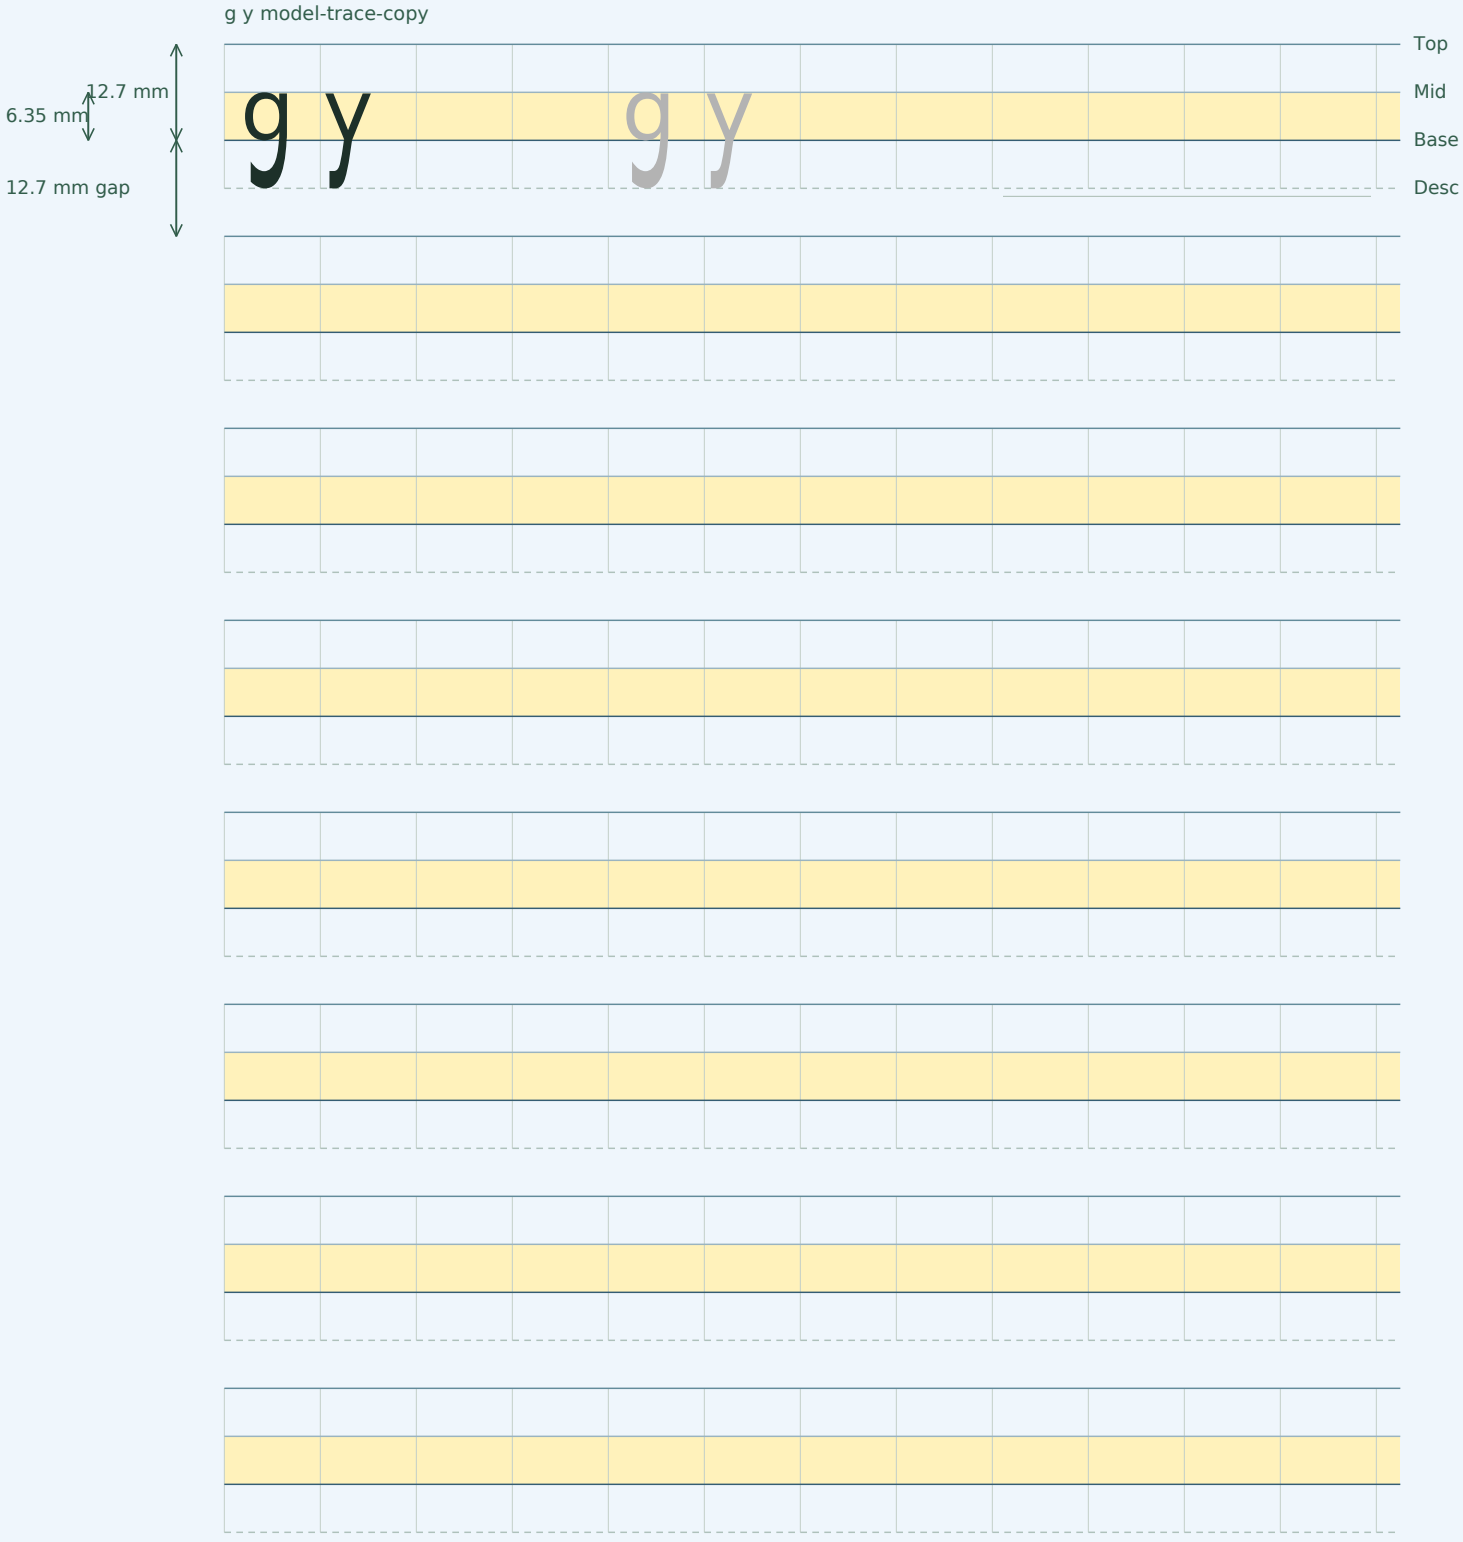

Worksheet tall-letter band: model l and h, gray traces, blank copying attempts

One physical row: model l h, one gray trace each, one blank copy each. Hypothetical 0.5 in rule spacing.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

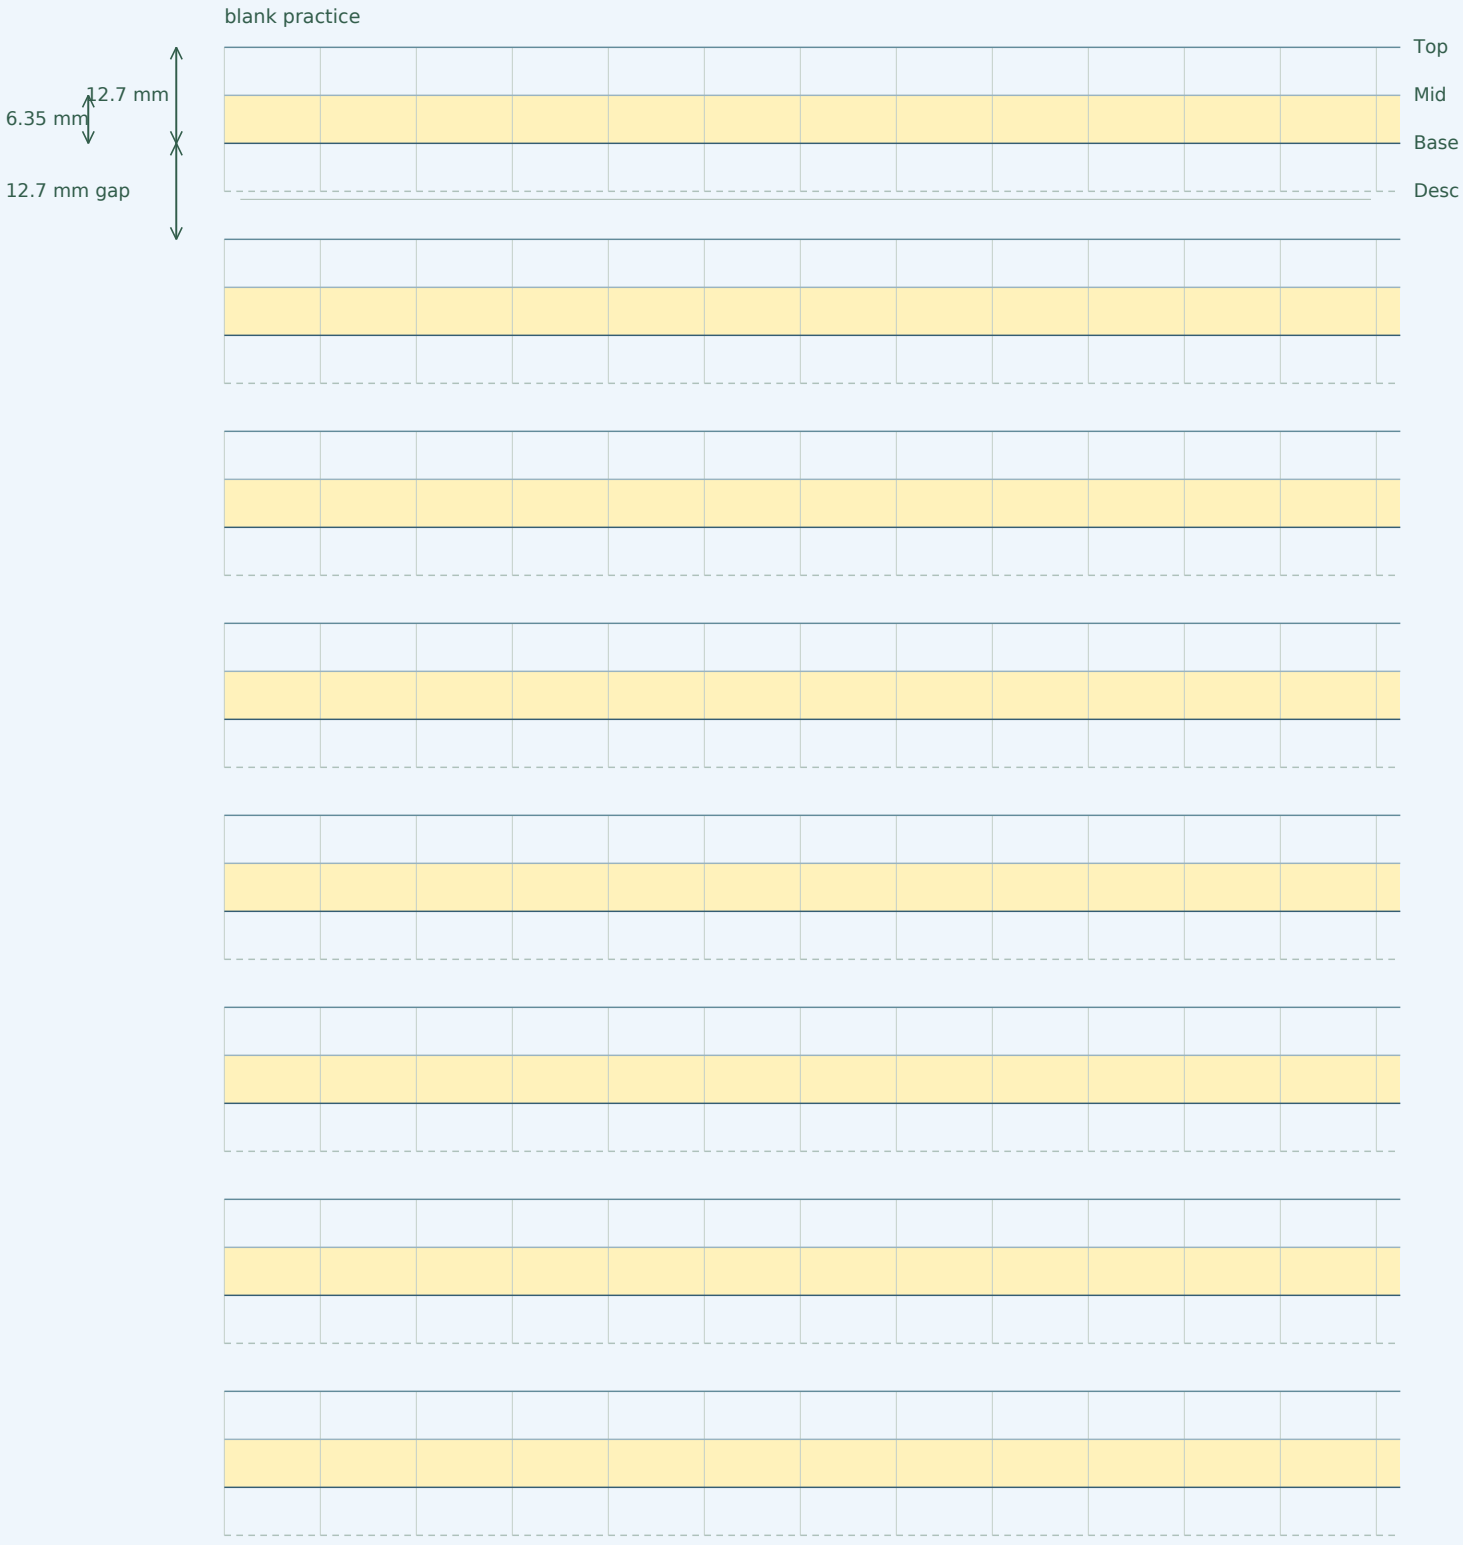

Worksheet descending-letter band: model g and y, gray traces, blank copying attempts

One physical row: model g y, one gray trace each, one blank copy each. Hypothetical 0.5 in rule spacing.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

Worksheet blank practice band for letter-count comparison

Genuinely blank row for student writing and counting. Hypothetical 0.5 in rule spacing.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

Original tasks 1, 2, 3 / blank responses

Task 1

A portrait sheet measures 11 inches wide and 17 inches tall. Is it portrait? Explain using the measured values.

Task 2

A printed page has rules spaced 0.5 inch apart. A lowercase o is written from the baseline to the midline. What vertical distance does the o occupy, and which rule marks its top?

Task 3

A writing band is 8 inches wide. Using a hypothetical letter-plus-gap width of 1 inch, estimate the number of letters that fit. Then state one reason the estimate may differ on real paper.

Portrait Ledger Wide-Ruled Lined Paper: Layout, Margins, and Practice

Original tasks 4 / blank responses

Task 4

A header line is drawn but it slopes toward the first horizontal rule on the right side. Describe one check to detect this and one fix.
