Blank Slope Graph Paper: Coordinate Grid with Rise-Run Plotting Space

Slope Graph Template Layout Diagram

Large square coordinate grid with equal unit spacing on both axes; origin labeled; consistent unit intervals.

Blank Slope Graph Paper: Coordinate Grid with Rise-Run Plotting Space

Side Column: Rise, Run, Y-Intercept, Sign Convention

Side column layout; boxes sized for signed numbers and ordered pairs.

Sign convention: rise upward is positive, downward is negative; run rightward is positive, leftward is negative.

Rise box: record the signed vertical change.

Run box: record the signed horizontal change.

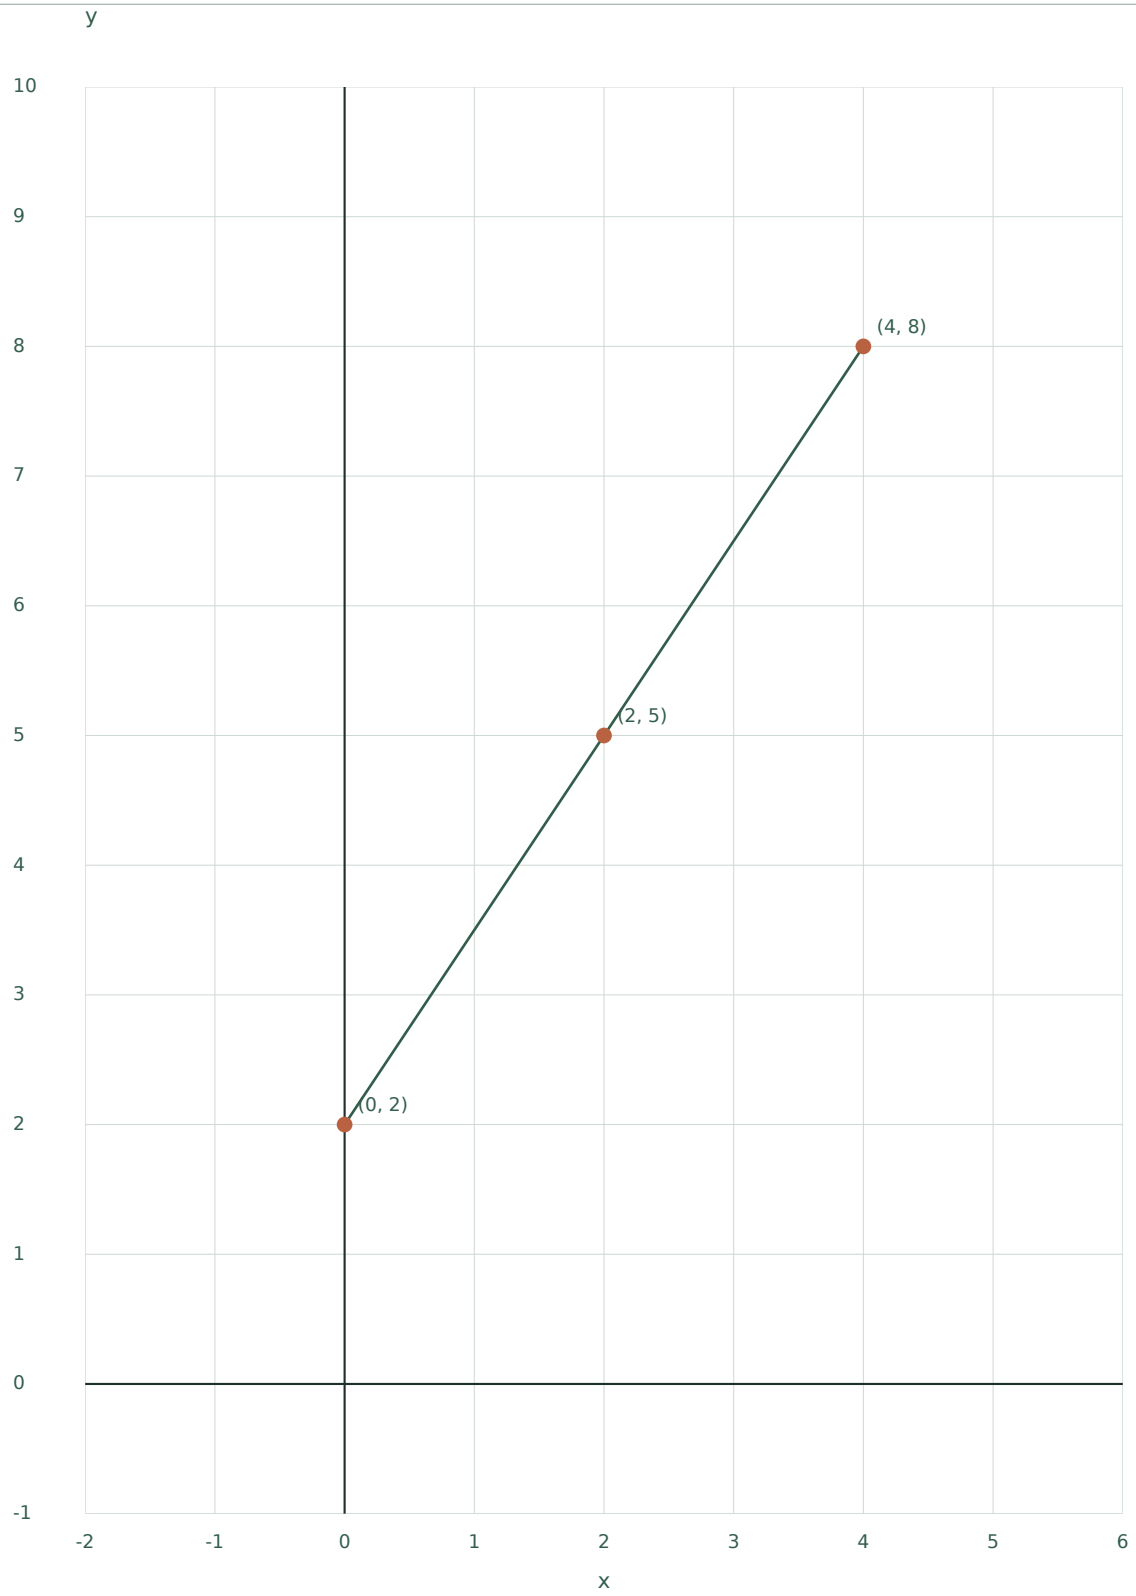

Y-intercept marker space: record the starting point as an ordered pair, e.g. (0, 2).

Slope is written as rise over run in the side column.

For a negative slope, attach the negative sign to exactly one of rise or run and state that choice.

Blank Slope Graph Paper: Coordinate Grid with Rise-Run Plotting Space

Worked Example: y-intercept (0, 2), slope 3/2

Record intercept (0, 2), rise 3, run 2; plot (0, 2), (2, 5), (4, 8); slope check 3/2.
