Coyote Drawing: Proportions for Head, Legs, and Tail

Original tasks 1, 2 / independent work

Task 1

A side-view coyote has shoulder height 6 cm. The head is drawn 2.4 cm long. Is the head proportion close to the lesson target?

Task 2

A coyote drawing has shoulder height 5 cm and front leg length 4.6 cm. Is the leg proportion acceptable?

Coyote Drawing: Proportions for Head, Legs, and Tail

Original tasks 3, 4 / independent work

Task 3

A tail is drawn 4.5 cm long on a coyote with shoulder height 6 cm. What is the target tail length, and is the drawn tail close?

Task 4

A head is 3 cm long. The ears are each drawn 1.8 cm tall. Using the lesson rule, what ear height is expected, and is this close?
