Draw a Lunch Still Life: Food Shapes and Basic Shading

Original worked example / unchanged complete key

Prompt: Draw a lunch still life with a sandwich triangle, a round fruit, and a cylindrical drink inside a rectangle lunchbox. Use light from the upper left and add basic shading.

Answer: A rectangle lunchbox contains a triangle sandwich at back-left, a circle fruit at front-right, and a cylinder drink at back-right. Light strokes shade the lower-right side of each object, highlights sit on the upper-left, and cast shadows fall to the lower right on the lunchbox surface.
