Draw a Teacher Figure: Posture, Props, and Simple Classroom Context

Original worked example / unchanged complete key

Prompt: A student draws a teacher figure on a 15 cm by 20 cm paper. The head is 2 cm tall, the torso is 3 cm tall, and the legs are 4 cm tall. The book is 1.5 cm wide and 1 cm tall, placed at waist height. The pointer is 5 cm long and points to the board. Check the total height and prop placement.

Answer: Total height is 2 + 3 + 4 = 9 cm. The book is at waist height, which is about 5.5 cm from the ground (legs 4 cm plus half the torso 1.5 cm). The pointer is 5 cm long and reaches the board if the board edge is within 5 cm of the hand. All values are consistent and fit the paper.
