Draw Zeus: Beard, Drapery, and Thunderbolt Construction

Original worked example / unchanged complete key

Prompt: On an 18 cm figure divided into three 6 cm bands, place a head oval in the top band, a torso trapezoid in the middle band, and a wider lower drapery trapezoid. Add a rounded beard wedge below the chin and a 5 cm double zigzag thunderbolt in the right hand, not crossing the face.

Answer: The figure has three equal bands. The head oval sits in the top band, the torso trapezoid in the middle, and the lower drapery is wider than the torso. The beard is a rounded wedge below the chin with a center part. The thunderbolt is a double zigzag with a grip in the right hand, placed to the side so it does not cross the face. Shoulders are wider than hips and the midline is centered.
