Draw a Generic Banknote: Border, Portrait, and Value Layout

Original worked example / unchanged complete key

Prompt: On a 12 cm by 8 cm rectangle, draw a generic banknote with a 0.8 cm border, a portrait area in the left third, and value marks in the top-right and bottom-right corners. Use a simple face and consistent numerals.

Answer: Draw the outer rectangle. Mark 0.8 cm from each edge and connect the marks for the inner border. In the left third, draw a light oval about 3 cm wide and 4 cm tall, then sketch a generic head-and-shoulders shape inside. In the top-right and bottom-right corners, write the same fictional value, such as 25, with numerals at equal height. Add one small emblem in the lower-left empty area. Erase construction lines and darken final lines. Check that opposite border widths match, the portrait does not touch the border, and both value marks are legible.
