Pony Drawing: Body Proportions and Mane Construction

Original tasks 1, 2 / independent work

Task 1

A pony head unit measures 5 cm. Calculate the working body length (chest to rump) and leg length (shoulder to hoof) using two and a half and one and a half head units.

Task 2

A drawn pony has a head unit of 3 cm, a body length of 10 cm, and a leg length of 4 cm. Using absolute differences from the working guide, identify which proportion is furthest off and state a correction.

Pony Drawing: Body Proportions and Mane Construction

Original tasks 3, 4 / independent work

Task 3

Describe how to construct a mane in three layers for a pony in side view, including where the roots should sit and how many locks to use.

Task 4

A pony is drawn in a slight three-quarter view with a head unit of 4 cm. The visible body length is 9 cm and the leg length is 6 cm. State whether the leg proportion matches the guide and give one adjustment for the three-quarter view.
