Vegetable Contour Drawing: Compare Edges and Shapes

Original worked example / unchanged complete key

Prompt: A zucchini is described as follows: baseline to midline is 6 cm, midline to top is 4 cm, and width at midline is 5 cm. Draw a measured contour in a bounding box and label the measurements.

Answer: Total height is 6 + 4 = 10 cm. Width is 5 cm. The bounding box is 5 cm wide and 10 cm tall. The midline sits 6 cm above the baseline. The widest point of the contour touches the midline at 5 cm width. The contour tapers from the midline to the top over 4 cm and to the baseline over 6 cm. Labels: lower height 6 cm, upper height 4 cm, total height 10 cm, width 5 cm.
