Pumpkin Patch Drawing: Vine Rows and Varied Gourds

Original worked example / unchanged complete key

Prompt: On a 20 cm wide page, draw a pumpkin patch with three vine rows, three varied gourds, and a ground contour. Use the baseline-to-midline convention.

Answer: Draw the horizon at the midline and the baseline near the bottom. Sketch three gentle curves from baseline to midline, spaced about 3 cm apart at the baseline as a hypothetical example. Place a round gourd on the left row, a tall gourd on the middle row, and a tilted gourd on the right row, each with a short stem. Add a vine line along each row with three small leaves per row. Add sparse ground marks between rows. Check that rows converge slightly, gourds vary in size and shape, and leaves do not hide outlines.
