# Soccer Player Drawing: Action Pose Construction and Kit Detail

Original task 1 / independent drawing and calculation

## Task 1

Draw an armature for a soccer player kicking with the right foot. Use these hypothetical angles: spine 12 degrees forward, left thigh 20 degrees forward, left knee bent 50 degrees, right thigh 25 degrees back, right knee 10 degrees bent, left arm 30 degrees forward, right arm 20 degrees back. Mark all joints and check balance.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Original task 2 / independent drawing and calculation

## Task 2

Add kit detail to the kicking armature from Exercise 1 using the convention: jersey as a rounded rectangle following the torso, shorts below the hip line, socks from knee to ankle, cleats as low wedges. Keep joint marks visible until final.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Original task 3 / independent drawing and calculation

## Task 3

Create an angle guide on a separate sheet with lines at 0, 15, 30, 45, and 60 degrees from vertical. Place a blank armature beside it and adjust one limb to 30 degrees. State the units you used.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

# Soccer Player Drawing: Action Pose Construction and Kit Detail

Original task 4 / independent drawing and calculation

## Task 4

Draw a soccer player in a running pose moving left. Choose your own hypothetical angles, label them, and add a simple jersey number using the x-height convention. Check balance and list two valid alternative kit styles.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

## Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
