Cat Eyes Drawing: Slit Pupil, Almond Lids, and Fur Rim

Original worked example / unchanged complete key

Prompt: Draw a cat eye with a 50 mm wide almond, a 20 mm high almond, and a slit pupil 3 mm wide and 14 mm high. Describe the construction and one check.

Answer: Draw a horizontal axis and mark the center. Mark corners 25 mm from the center. Mark the top midpoint 10 mm above the axis and the bottom midpoint 10 mm below. Connect with smooth curves, keeping the upper curve fuller. Draw the pupil centered on the axis, 3 mm wide and 14 mm high, leaving a 3 mm iris margin above and below. Check that the pupil height plus two margins equals 20 mm: 14 + 3 + 3 = 20 mm.
