Draw Organic Camouflage Blotches: A Step-by-Step Guide

Original worked example / unchanged complete key

Prompt: On a hypothetical 8 cm by 8 cm field, place three mid-value blotches, four light dots, and two dark fingers. Describe the order and one adjustment after a squint check.

Answer: Draw three mid-value blotches 2 to 3 cm across, spaced with gaps. Add four light dots 0.5 to 1 cm wide between them. Draw two dark fingers 1 cm wide crossing blotch edges. Squint: if two mid blotches merge, lighten one by one value step. The field now has layered depth and negative space.
