Tennis Court Plan Drawing: Labeled Zones and Scale

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Tennis Court Plan Drawing: Labeled Zones and Scale

Worked example / complete source key

Draw a tennis court plan at a hypothetical scale of 1 cm = 2 m using length 24 m and width 11 m. Place the net at the midpoint, service lines 6 m from the net, and a center service line. Label the baselines, net, service lines, and four service boxes.

Answer: The drawing is a 12 cm by 5.5 cm rectangle. The net is a line across the width at 6 cm from each baseline. Service lines are 3 cm from the net on each side. The center service line runs from the net to each service line at 2.75 cm from each sideline. Labels: Baseline at both short ends, Net at the middle line, Service line on both halves, and Left/Right service box on each half with the viewing convention stated.
