Straight Hair Drawing: Fall-Line Strand Construction

Original task 1 / independent drawing and calculation

Task 1

Draw a head outline and three fall lines. Section A has 6 strands, section B has 6 strands, section C has 6 strands. Each strand tapers from 2 mm to 1 mm. Check direction against arrows.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Straight Hair Drawing: Fall-Line Strand Construction

Original task 2 / independent drawing and calculation

Task 2

Section B intentionally has 4 strands while A and C have 8. Draw the plate and label why B is less dense. Use a hypothetical 10 cm panel.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Straight Hair Drawing: Fall-Line Strand Construction

Original task 3 / independent drawing and calculation

Task 3

Draw a plate where two strands in section C cross near the ends only. All other strands remain parallel. Label the overlap point.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Straight Hair Drawing: Fall-Line Strand Construction

Original task 4 / independent drawing and calculation

Task 4

Draw a plate with three fall lines that curve slightly around the skull. Keep strands parallel to the curved fall lines. Use 5 strands per section and taper each from 3 mm to 1 mm.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
