Draw a Dalmatian: Spotted Coat, Head Shape, and Stance

Original worked example / unchanged complete key

Prompt: A student draws a side-view Dalmatian with a level back, deep chest, and long legs. They place five medium spots on the torso, two small spots on the head, and none on the legs. Check the spot pattern using the three-zone rule and suggest one fix.

Answer: The torso and head zones meet the minimum of three spots, but the leg zones have none, so the pattern is unbalanced. Add at least three small spots to each front and rear leg zone, keeping them inside the outline and spaced apart. This satisfies the three-zone rule and improves readability.
