Draw a Paw: Pad and Toe Construction Practice

Original worked example / unchanged complete key

Prompt: Using a 20 mm baseline-to-midline unit, construct a paw with a main pad 2 units wide and 1.2 units tall, four toe pads 0.6 units wide in an arc with a 0.3 unit gap above the main pad.

Answer: Main pad: 40 mm wide, 24 mm tall. Toe pads: 12 mm wide each, centered on an arc 6 mm above the main pad. Four toe centers spaced evenly across the arc. Claws short, angled outward. Check: main pad wider than tall; toe pads do not overlap main pad; left and right spacing balanced.
