Winky Face Drawing: Eye and Mouth Expression Variations

Original tasks 1, 2, 3 / complete keys

Task 1

Draw a winky face with an oval open eye and a single downward curve for the winky eye. Use a smile mouth. Face circle 6 cm, hypothetical x-height 1.5 cm.

Answer: A face circle with an oval open eye centered on the midline, a single downward curve on the opposite side centered on the same midline, and a smile curve about 1 cm below the midline.

Reason: The oval open eye and single curve closed eye create clear contrast; the smile supports the playful tone.

Check: Confirm one eye is open and one is closed, both on the midline, and the mouth is below the midline without touching the circle edge.

Task 2

Draw a winky face with a small-circle open eye with a dot and a shallow V winky eye. Use a small open oval mouth. Face circle 6 cm, hypothetical x-height 1.5 cm.

Answer: A face circle with a small-circle open eye containing a dot centered on the midline, a shallow V on the opposite side centered on the same midline, and a small open oval mouth about 1 cm below the midline.

Reason: The dot makes the open eye readable; the shallow V is a clear closed-eye option; the small oval mouth is a defined mouth variation.

Check: Check that the open eye has a visible dot, the closed eye is shorter than the open eye, and the mouth is narrower than the eye distance.

Task 3

Draw a winky face with a round open eye and an upward curve winky eye. Use a flat line with a corner lift for the mouth. Face circle 6 cm, hypothetical x-height 1.5 cm.

Answer: A face circle with a round open eye centered on the midline, an upward curve on the opposite side centered on the same midline, and a flat mouth line with one corner lifted about 1 cm below the midline.

Reason: The upward curve is a valid closed-eye option; the flat line with a corner lift is a defined mouth variation that keeps the winky tone.

Check: Verify the closed eye reads as closed, the mouth corner lift is visible, and no extra facial expressions are added.

Winky Face Drawing: Eye and Mouth Expression Variations

Original tasks 4 / complete keys

Task 4

Draw a winky face with an oval open eye and a single downward curve winky eye. Use a smirk mouth. Face circle 6 cm, hypothetical x-height 1.5 cm. Then score your drawing with the rubric.

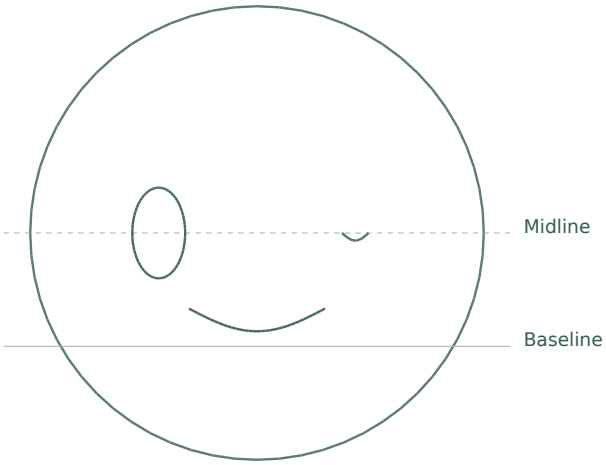

Answer: A face circle with an oval open eye centered on the midline, a single downward curve on the opposite side centered on the same midline, and a smirk mouth with one corner lifted. Rubric scores should total at least 8 out of 10 for a valid result.

Reason: The eye contrast and smirk mouth are consistent; scoring with the rubric checks clarity, contrast, placement, consistency, and boundary.

Check: Re-score each rubric item after one improvement; confirm the total is 8 or higher and the winky signal is clear.

Task 1 / answers

Chosen sample: Oval + downward curve + smile

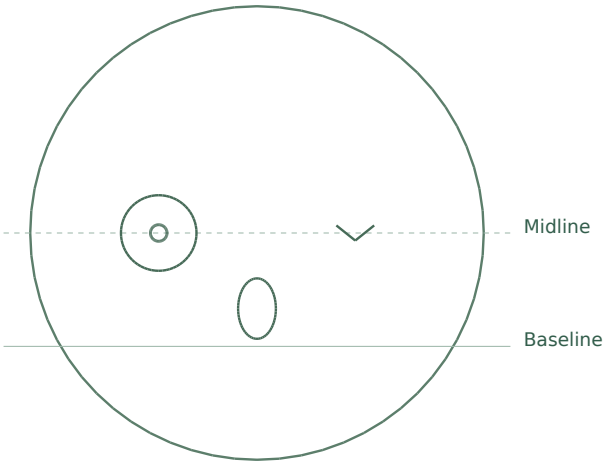

Face-circle diameter 60 mm. Baseline to midline: 15.0 mm. The face geometry and feature sizes are lesson examples, not anatomical measurements.

Your rubric/check: ____ Revision: ____

Task 2 / answers

Chosen sample: Circle + dot + V + oval

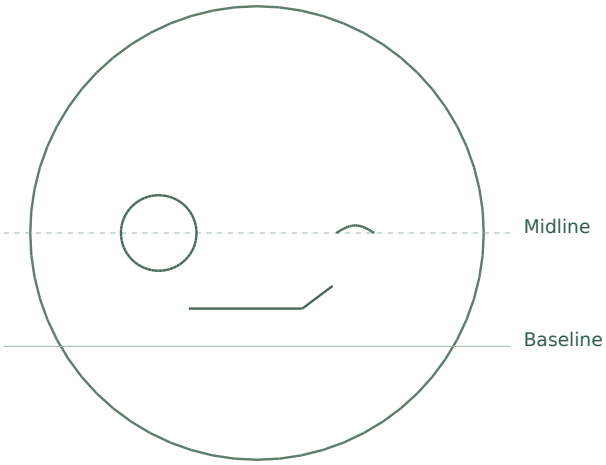

Face-circle diameter 60 mm. Baseline to midline: 15.0 mm. The face geometry and feature sizes are lesson examples, not anatomical measurements.

Your rubric/check: ____ Revision: ____

Task 3 / answers

Chosen sample: Round + upward curve + lifted corner

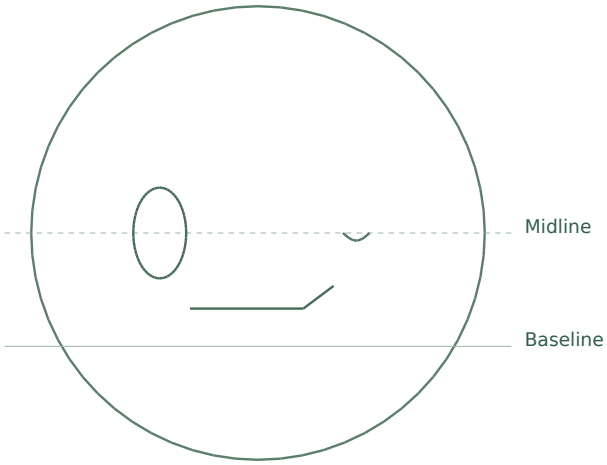

Face-circle diameter 60 mm. Baseline to midline: 15.0 mm. The face geometry and feature sizes are lesson examples, not anatomical measurements.

Your rubric/check: ____ Revision: ____

Task 4 / answers

Chosen sample: Oval + downward curve + smirk

Face-circle diameter 60 mm. Baseline to midline: 15.0 mm. The face geometry and feature sizes are lesson examples, not anatomical measurements.

Your rubric/check: ____ Revision: ____

Winky Face Drawing: Eye and Mouth Expression Variations

Source rubric / reflection

- [ ] Clarity: the winky signal is obvious at a glance (0-2).
- [ ] Contrast: the open eye and closed eye are clearly different (0-2).
- [ ] Placement: both eyes sit on the midline and the mouth sits below it (0-2).
- [ ] Consistency: the mouth matches the playful winky tone (0-2).
- [ ] Boundary: no full cartoon characters or other facial expressions (0-2).

Reflection: What did you check, what did you change, and what will you try next?
