Winky Face Drawing: Eye and Mouth Expression Variations

Original worked example / unchanged complete key

Prompt: Draw a winky face on a 6 cm face circle with a round open eye, a shallow V winky eye, and a smirk mouth. Use a hypothetical x-height of 1.5 cm.

Answer: Draw the face circle and mark the baseline and the midline 1.5 cm above it. Center the round open eye on the midline on one side. Draw the shallow V winky eye on the opposite side, centered on the same midline and about half the open eye's width. Draw the smirk mouth about 1 cm below the midline with one corner lifted. Check that one eye is clearly open, one is clearly closed, both are centered on the midline, and the mouth is readable.
