Worker Drawing: Pose, Tool, and Clothing Construction

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Worker Drawing: Pose, Tool, and Clothing Construction

Worked example / complete source key

Draw a worker holding a simple hand tool at waist height, with weight on the left foot and the tool pointing toward a task area on the right. Use the midline as the hip landmark and show one protective clothing detail.

Answer: The figure stands with the left foot on the baseline under the hip midline. The right foot is offset slightly. The shoulder line tilts down toward the right, where the tool hand is. The handle line runs from the right hand toward the task area, and the working end is a simple shape at the far end. The hand wraps the handle with the thumb on the near side. The work layer has a clear front opening, and a cuff appears at the tool-side wrist. Compression folds appear at the bent right elbow. Check: head above left foot, hand on handle, working end toward task, cuff at wrist landmark.
