Draw a Side-View Ox: Body Mass, Horn Curves, and Hoof Placement

Original worked example / unchanged complete key

Prompt: A learner draws a body oval 8 cm long and 4 cm tall, a head block 2 cm tall, and horns 1 cm tall. They place hooves 1 cm above the ground line. Identify one proportion check and one placement check.

Answer: Proportion check: the body oval is 8:4, or 2:1, which matches the guide. Placement check: the hooves are 1 cm above the ground line, so they must be moved down until their bottom edges touch the line.
