Draw Animation Eyes: Oversized Iris and Three-Frame Blink

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw Animation Eyes: Oversized Iris and Three-Frame Blink

Worked example / complete source key

Draw a three-frame blink strip with eye height 20 mm, eye width 30 mm, iris diameter 16 mm, and a 2 mm highlight dot placed upper-left inside the iris. Show open, half-closed, and closed frames.

Answer: Frame 1: baseline and midline 20 mm apart; iris circle 16 mm centered above baseline; highlight dot 2 mm upper-left, fully inside iris; top lid at midline. Frame 2: same iris and dot; top lid lowered to 10 mm above baseline, covering upper iris. Frame 3: same iris position but hidden; top lid meets baseline; no highlight visible. Check: iris diameter 16 mm is between 12 mm and 18 mm; dot stays inside iris in frames 1 and 2; lid positions are 20 mm, 10 mm, and 0 mm above baseline.
