Draw Front-View Lips: Outline, Cupid's Bow, and Simple Shading

Original worked example / unchanged complete key

Prompt: Draw front-view lips on a 6 cm midline with a centered cupid's bow, then apply three shading steps. Use a hypothetical width of 6 cm and height of 2 cm.

Answer: The outline shows a 6 cm midline, two small peaks above the center forming the cupid's bow, outer corners at equal distances from the center, and a rounded lower-lip curve below. The width-to-height ratio is 6:2, or 3:1. Shading step one fills the lips with a light base color. Step two darkens the outer edges and the area under the cupid's bow. Step three adds a small highlight near the center of the lower lip. The outline remains visible and the drawing reads as front-view lips.
