One-Point Perspective Bedroom Drawing: Bed, Window, Door

Original worked example / unchanged complete key

Prompt: On A4 paper, draw a room box with the vanishing point 1 cm above center. Place a bed against the right wall, a window on the left wall, and a door on the back wall. Use a bed length about twice its width and a door height about 2 m (hypothetical).

Answer: Back wall 8 cm by 6 cm; vanishing point 1 cm above center. Bed near footprint 3 cm wide on the floor, carried back on receding lines to about 6 cm length; near vertical corner 2 cm tall, far corner shorter. Window near vertical side 2 cm from the left wall corner, top and bottom edges receding, far side 3 cm farther back. Door on back wall 2.5 cm wide and 4 cm tall, with a 0.3 cm frame. All receding edges aim at the single vanishing point; vertical edges stay vertical.
