Blacksmith Drawing: Pose, Anvil, and Hand Tools

Original task 1 / independent drawing and calculation

Task 1

Draw a blacksmith standing with feet apart, knees slightly bent, and a right arm reaching to an anvil top. The anvil is half the torso width and sits on the ground line. Add a hammer with a rectangular head.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Blacksmith Drawing: Pose, Anvil, and Hand Tools

Original task 2 / independent drawing and calculation

Task 2

Draw the same blacksmith but left-handed, with tongs instead of a hammer. The tong jaws should rest on the anvil face. Keep the apron below the waist.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Blacksmith Drawing: Pose, Anvil, and Hand Tools

Original task 3 / independent drawing and calculation

Task 3

Draw a blacksmith leaning slightly toward the anvil with a punch lying on the anvil base. The hammer hand is near the anvil face but the hammer head points away from the body. Add a hardy hole as a small square on the top face.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Blacksmith Drawing: Pose, Anvil, and Hand Tools

Original task 4 / independent drawing and calculation

Task 4

Draw a blacksmith with a short apron ending above the knee and a hammer held at the anvil face. Add a second tool on the ground beside the anvil. Use a ground line for both feet and the anvil.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
