Draw a Plain Cross: Proportion and Shading Guide

Original worked example / unchanged complete key

Prompt: Draw a plain cross with vertical length 8 units, horizontal length 4 units, crossing point 2 units from the top, and arm width 1 unit. Shade with light from the upper left.

Answer: A closed cross outline with a vertical bar 8 units tall, a horizontal bar 4 units wide centered at 2 units from the top, and all four arm ends 1 unit wide. Shading is light on upper left faces, middle on side faces, and dark on lower right edges and inner corners. Opposite arms match and the outline remains visible.
