Draw a Dung Beetle: Domed Body and Rolling Ball

Original worked example / unchanged complete key

Prompt: Draw a dung beetle with a domed body and a ball in front. Use a ground line. Make the dome 6 cm wide and 3 cm tall, the ball 5 cm across, and each leg segment about 1.5 cm long. Show the front legs touching the ball and the back legs on the ground.

Answer: A completed drawing shows a low smooth dome 6 cm wide and 3 cm tall. A small head tucks under the front. The ball is a 5 cm circle on the ground line in front of the dome. The front legs reach the ball with two visible segments and joint dots. The middle and back legs are short, thick, and braced on the ground line. The dome tilts slightly forward. The drawing is clear even without shading.
