Draw a Gladiator: Armor, Stance, and Proportion Guide

Original tasks 1, 2 / independent work

Task 1

Using a six-unit height, place the hip line and knee line. State their distances from the baseline in units.

Task 2

A shield is drawn four units tall on an eight-unit figure. What is the recommended height and the difference?

Draw a Gladiator: Armor, Stance, and Proportion Guide

Original tasks 3, 4 / independent work

Task 3

The front foot is two units forward and the back foot is zero units back. Describe the corrected stance using one-unit offsets.

Task 4

Greaves are drawn from hip to ankle on a figure with hip at four units and ankle at half a unit. State the correct start and end and the length in units.
