Pisces Drawing: Twin-Fish Glyph and Constellation

Original worked example / unchanged complete key

Prompt: On a grid with columns A–F and rows 1–6, draw the Pisces constellation using stars at (A2), (B1), (C2), (B3) for the left loop; (D2), (E1), (F2), (E3) for the right loop; and (C3), (D3) as bridge stars. Connect adjacent stars with straight lines.

Answer: The left loop forms a rounded chain through A2–B1–C2–B3–A2. The right loop forms a mirror chain through D2–E1–F2–E3–D2. The bridge is a continuous line from the left loop's C2 to C3, across to D3, and into the right loop's D2. The result is two distinct loops joined by a continuous middle line.
