Swim Drawing Easy: Three Stroke Poses and Poolside Context

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Swim Drawing Easy: Three Stroke Poses and Poolside Context

Worked example / complete source key

A body line is 12 cm long. The head circle is 1.5 cm across. A leg is drawn 6 cm long and an arm 5 cm long. Check whether the head-to-body ratio and limb lengths are consistent with the guide.

Answer: The head-to-body ratio is 1.5 divided by 12, which equals 0.125, or one-eighth. The leg is 6 cm, which is half of 12 cm. The arm is 5 cm, slightly less than half. These values match the hypothetical starting points, so the proportions are consistent.
