# Draw a Mother and Son Pair: Proportion, Pose and Shared Gesture

Original tasks 1, 2 / independent work

## Task 1

A father's height on your page is 180 mm from baseline to head midline. Using a ratio of 1.8, calculate the child's height and state the guide-line position.

## Task 2

An adult shoulder is marked at 140 mm above baseline and the child height is 90 mm. Suggest a hypothetical child shoulder height that keeps the relationship readable, and explain the check.

# Draw a Mother and Son Pair: Proportion, Pose and Shared Gesture

Original tasks 3, 4 / independent work

## Task 3

Two figures are drawn with the adult leaning 12 degrees toward the joined hands and the child leaning 5 degrees away. Describe the fix and the check.

## Task 4

A drawing shows the joined hands behind the adult's torso and the child's arm crossing the adult's body. Describe a correction using landmarks and a check.
