Sunfish Drawing: Disc Body and Fin Layout

Original worked example / unchanged complete key

Prompt: A student draws a disc body 8 cm wide and 8 cm tall on a baseline. The horizontal midline is at 4 cm above the baseline. The dorsal fin starts at 5 cm from the left and ends at 7 cm. The anal fin starts at 5 cm and ends at 7 cm on the bottom. The caudal fin is centered at 8 cm. Is the layout consistent with the convention?

Answer: Yes. The body is a disc (8 cm by 8 cm), the dorsal and anal fins are opposite and equal in length (2 cm each), and the caudal fin is centered at the rear on the horizontal midline. The mouth should be small and slightly above the horizontal midline at the front edge.
