Draw an Anime Male: Stylized Head, Hair Mass, and Body Proportions

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw an Anime Male: Stylized Head, Hair Mass, and Body Proportions

Worked example / complete source key

A drawing has a measured head height H of 5 cm. Using the seven-head convention, find the shoulder, waist, hip, knee, and foot levels measured downward from the skull top, and state one check.

Answer: Shoulders at 1.5 H = 7.5 cm; waist at 3 H = 15 cm; hips at 3.5 H = 17.5 cm; knees at 5 H = 25 cm; feet at 7 H = 35 cm. Check: the foot level equals seven times the measured head height, and all units use the same 5 cm H.

Reason: Multiply the measured head height by each unit multiplier. Keep units in centimeters and verify the final foot level equals 7 H.

Check: Re-measure H on the drawing, multiply by 7, and compare with the marked foot level; they should match within your measurement precision.
