Draw a Paleolithic Cave-Art Animal Figure

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Paleolithic Cave-Art Animal Figure

Worked example / complete source key

A frame is 15 cm wide and 10 cm high. Plan an animal length of two-thirds the frame width, divide it into torso 6 cm, head 3 cm, and tail 1 cm, and state the line-weight convention.

Answer: Two-thirds of 15 cm is 10 cm. The parts add to 6 + 3 + 1 = 10 cm, so the plan is consistent. Use outline width 2 mm and interior detail width 1 mm as hypothetical examples, measured on your own tools. Draw the outline-only silhouette inside the frame with clear space around it.
