Camel hump

Lizard scales

Fennec ears

Draw Desert Animals: Camel Hump, Lizard Scales, Fennec Ears

Original worked example / unchanged complete key

Prompt: Draw a combined study sheet with three frames: a camel hump, a lizard scale patch, and a pair of fennec ears. Use the construction cues and label each frame.

Answer: Frame 1: a dome about 3 cm wide at the base and 3 cm high, with softened base joins and one inner curve. Frame 2: two guide lines 2 cm apart, four rows of six oval scales, each row offset by half a scale. Frame 3: two ears with 1 cm bases on a 3 cm head circle, each ear about 2 cm long with rounded tips and one inner curve. Labels are legible and placed below each frame.

Reason: The hump uses a broad base and equal height to read as a mass. The scales use offset rows to create a repeating pattern. The ears use a base on top of the head and a length-to-width ratio of about two to one. Labels separate the features and keep the study within the lesson boundary.

Check: Measure the hump base and height; they should be within 0.5 cm of each other. Count scales per row; each row should have the same number. Measure ear length and base width; length should be about twice the base. Confirm all labels are readable.
