Draw a Beach Sunset: Shoreline and Reflection Steps

Original worked example / unchanged complete key

Prompt: A student draws a horizon at 30 percent from the top, places the sun center two x-heights above the horizon, draws a gentle shoreline curve in the lower third, and adds four reflection bands below the sun. The bands stop at the shoreline. The student shades the upper sky medium and the bottom water dark. Is this consistent with the guide?

Answer: Yes. The horizon is in the upper third, the sun is low and above the horizon, the shoreline is curved in the lower third, and the reflection bands are centered under the sun and stop at the shoreline. The tonal guide is followed with medium upper sky and dark bottom water.
