Cartoon Turtle Drawing: Shell Pattern, Flippers, and Head

Original worked example / unchanged complete key

Prompt: Draw a cartoon turtle on a sheet of paper about 20 cm by 25 cm. Use a shell oval about 10 cm wide and 7 cm tall, a head oval about 4 cm wide, and four flippers about 3 cm long. Add a shell pattern with three large central shapes and six smaller edge shapes. Place two round eyes above the head's midline and a short curved mouth below.

Answer: The finished drawing shows a wide, slightly flattened shell with three large central sections and six smaller edge sections. The head overlaps the front of the shell, with two large round eyes above the midline and a short curved mouth. Four rounded flippers touch the shell, two at the front and two at the back. The outline is darkened, construction lines are erased, and the pattern remains readable from a short distance.
