Drawing a Fist: Front and Side Knuckle Construction

Original worked example / unchanged complete key

Prompt: Draw a front-view fist on a grid with a rounded rectangle 3 units wide and 4 units tall, a midline at 2 units, and four knuckle circles along a shallow arc.

Answer: The rectangle is centered on the grid. The midline crosses at 2 units from the top. The knuckle arc rises slightly in the middle, with four circles spaced evenly. Finger segments below each knuckle are short and taper inward. The thumb is not visible in front view. Shade the gaps between fingers darker than the knuckle peaks.
