Easy Wolf Face Drawing: Muzzle, Ears, and Eye Placement

Original worked example / unchanged complete key

Prompt: Draw a front-facing wolf face on a 15 cm by 20 cm sheet using the convention: oval 8 cm tall and 6 cm wide, eye line at 4 cm from the top, muzzle top 3 cm wide at the eye line, nose 1.5 cm wide and 2 cm below the eye line, ears with 2 cm bases and 3 cm heights set 1 cm below the top, eye centers 1 cm from center, eyes 1 cm wide. Describe the construction and check the proportions.

Answer: Draw a vertical center line. Draw the oval 8 cm tall and 6 cm wide. Mark the eye line 4 cm from the top. Mark the nose point 2 cm below the eye line on the center line. Mark muzzle top points 1.5 cm left and right of center on the eye line, and connect them to the nose point. Draw a small nose pad at the nose point. Mark ear bases 1 cm below the top and 2 cm left and right of center; draw triangles 2 cm wide at the base and 3 cm tall, tilting outward. Mark eye centers 1 cm left and right of center on the eye line; draw eyes 1 cm wide and 0.6 cm tall, so the gap between inner edges is about 1 cm. Check: oval height 8 cm is greater than width 6 cm; muzzle narrows from 3 cm to 1.5 cm; ears sit above the eyes; the gap between inner eye edges is about 1 cm, close to one eye width. Add light fur strokes and darken the nose and pupils.
