Draw a Yorkie: Head, Ears, and Body Proportions

Original tasks 1, 2 / independent work

Task 1

A head oval is 5 cm tall. Using the hypothetical 1 to 1.6 ratio, what body length should you mark?

Task 2

Your ear height is 3 cm and your x-height is 5 cm. Is the ear close to the hypothetical half-x-height guide?

Draw a Yorkie: Head, Ears, and Body Proportions

Original tasks 3, 4 / independent work

Task 3

A learner’s body oval is 9 cm and the head oval is 4 cm. What is the actual head-to-body ratio, and how does it compare to 1 to 1.6?

Task 4

You have drawn a head oval and two ear triangles, but the ears sit on the lower half of the head. What should you change, and what will you check afterward?
