Angled Face Drawing: Three-Quarter Feature Placement

Original task 1 / independent drawing and calculation

Task 1

On a blank angled head outline, the top of the skull is at 0 cm, the eye line at 5 cm, the nose line at 9 cm, and the chin at 11 cm. Place the near ear and state its height range.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Angled Face Drawing: Three-Quarter Feature Placement

Original task 2 / independent drawing and calculation

Task 2

A three-quarter face has a near-eye width of 3 cm. Using the teaching range of about half for the far eye, state a hypothetical far-eye width and explain the placement.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Angled Face Drawing: Three-Quarter Feature Placement

Original task 3 / independent drawing and calculation

Task 3

The eye line is at 6 cm, the nose line at 10 cm, and the chin at 13 cm. Where should the mouth sit, and what is the nose-to-chin distance?

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Angled Face Drawing: Three-Quarter Feature Placement

Original task 4 / independent drawing and calculation

Task 4

A shaded example shows the far side lighter than the near side. The eye line is at 4 cm and the nose line at 8 cm. State the ear height and one shading check.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
