Drawing Riddles: Sketch Answers in Boxes

Original worked example / unchanged complete key

Prompt: Clue: I have a handle and a spout, and I pour. Sketch me in the box.

Answer: A teapot sketched from the side: a rounded body, a handle on the left, a spout on the right, and a small lid line on top.

Reason: The clue names a handle, a spout, and pouring. A teapot has all three. A cup has a handle but usually no spout, so the teapot is the better fit. The sketch stays inside the box and shows the spout clearly.

Check: Score recognizability 2, clue fit 2, box fit 2, clarity 2. Total 8, which passes.
