Dragon Anatomy Drawing: Label Skeletal and Wing Structure

Original tasks 1, 2 / independent work

Task 1

On your plate, the torso oval is 9 cm long and the neck line is 4 cm long along the baseline. Record the combined length in centimeters.

Task 2

Your leading wing strut measures 7 cm and your trailing strut measures 4 cm. What is the strut difference in centimeters?

Dragon Anatomy Drawing: Label Skeletal and Wing Structure

Original tasks 3, 4 / independent work

Task 3

You have thirteen numbered labels: five body regions, four skeletal landmarks, and four wing labels. If you remove one body-region label, how many labels remain?

Task 4

A practice diagram has a torso oval 8 cm long, a tail taper 5 cm long, and a neck line 3 cm long. Record the total baseline length and state one checkable difference between the torso and tail lengths.
