Realistic Hair Drawing: Strand Flow and Shine Studies

Original tasks 1, 2 / independent work

Task 1

A practice box is 12 cm wide. You draw four guide curves from a left part to the lower edge, spaced evenly. What is the spacing between adjacent guides?

Task 2

You draw a shine band that crosses five strands. You then add two more strands inside the band. How many strands does the band cross now?

Realistic Hair Drawing: Strand Flow and Shine Studies

Original tasks 3, 4 / independent work

Task 3

A hair mass is 8 cm wide at its widest curve. You want a shine band that is one quarter of that width. How wide is the band in centimeters?

Task 4

You have three guide curves and you add two intermediate strands between each pair of guides. How many strands are there in total?
