Crappie Drawing: Body, Fins, and Scale Construction

Original tasks 1, 2 / independent work

Task 1

A crappie drawing has total length 24 units. Using the lesson proportions, calculate body depth and tail base width.

Task 2

Total length is 30 units. Find the start and end positions of the dorsal fin base from the snout using one-third and two-thirds of body length.

Crappie Drawing: Body, Fins, and Scale Construction

Original tasks 3, 4 / independent work

Task 3

A scale row has 12 scales. The next row is offset by half a scale. Describe where the first scale of the next row begins relative to the first scale of the previous row.

Task 4

A drawing has body depth 9 units. Using the example row spacing of one-tenth of body depth, calculate the spacing between scale rows.
